Career Roadmap in Computer Science & Cybersecurity

Name: Tahir Mehdi
Field: Computer Science & Cybersecurity

1. Academic Qualification

- **ADP CS (Associate Degree Program in Computer Science)** – *In Progress*
- After completion of ADP CS, I will **transition into BSCS (Bachelor of Science in Computer Science)** from **5th Semester**
- **Goal:** Complete a full **4-year BSCS equivalent degree**

2. Networking Foundation

- **CCNA (Cisco Certified Network Associate)** – *In Progress (along with ADP CS)*

Objective:
To build a strong foundation in:

- Networking fundamentals
- Routing & Switching
- Network troubleshooting

3. Cybersecurity Certification Path

After completing CCNA, I will move toward international cybersecurity certifications:

Step 1: Security Foundation

- **CompTIA Security+ (SY0-701)**

Goal:

- Understand core cybersecurity concepts
- Learn risk management, cryptography, and network security

4. Practical Experience (Internship / Job)

After Security+:

- Apply for:
  - **Network Analyst**
  - **Network Engineer**

Objective:

- Gain real-world experience
- Work in professional IT environments
- Strengthen networking and security skills

5. Advanced Penetration Testing Certifications

Alongside job/internship, I will pursue advanced ethical hacking certifications:

Beginner Level

- **eJPT (eLearnSecurity Junior Penetration Tester)**

Intermediate Level

- **eCPPT (eLearnSecurity Certified Professional Penetration Tester)**
- **eWPT (eLearnSecurity Web Application Penetration Tester)**

Advanced Level

- **eCPTX (eLearnSecurity Certified Penetration Tester eXtreme)**
- **OSCP (Offensive Security Certified Professional)**

6. Career Goal

To become a highly skilled:

- **Cybersecurity Expert**
- **Penetration Tester (Ethical Hacker)**

With expertise in:

- Network Security
- Web Application Security
- Advanced Penetration Testing

Be patient and you will get what you want
Imam Ali (A.S)
